What Does Cyber Risk Cost?

What Are The Leading Causes of Loss?

Let’s review the data from ACTUAL losses using the Claim Scenarios Tool found inside the eRiskHub® portal.

Get a glimpse of the rising costs of cyber incidents.

See how organizations are affected according to their size and industry. This data is pulled from the 2022 Annual Cyber Claims Study from NetDiligence. Download the full report in your eRiskHub portal today!

As an eRiskHub user, you can also make use of our Ransomware Impact Tool (shown here), also located inside the portal. This is another data-driven modeling tool available inside the eRiskHub.

Login today and keep a finger on the pulse of rising costs associated with cybersecurity and ransomware incidents.

Need a PowerPoint of this data?
NetDiligence can provide slide presentations which highlight the key findings from our annual Cyber Claims Study. We encourage you to leverage our presentations to further the knowledge of you and your internal team.

Please contact Micah Howser (Micah.Howsier@NetDiligence.com) or Mike Richoux (Mike.Richoux@NetDiligence.com) to request a copy of the Claims Study slide deck.

If you are a KACo Workers Compensation or All Lines Fund member, please contact Safety and Loss Control Specialist Dwayne Litton to receive registration instructions and the access code to login. Dwayne can be reached at dwayne.litton@kaco.org or by calling 502-223-7667.
